About This Game

FranknJohn is a horror inspired action roguelike, where your head **is** your weapon! Young FranknJohn is a failed experiment of a demented scientist, Dr Harmin. He wakes, with no memory, in a cell, with a head that can only stay on his body with the help of a chain. FranknJohn is far from helpless however, as his flaw becomes his strength - he can swing his head wildly round to smash away the plethora of strange creatures that roam the house of horror...

Current Features

- Smash enemies with FranknJohn's weaponized head
- Experiment with 20 different Skullcaps that alter gameplay in many different ways
- Huge skill tree. Collect Dr. Harmin's mysterious ooze and use it to upgrade your body and mind
- Randomly generated environments. A new experience with each new life
- Local co-op - play with a friend!
- Battle through the first area two areas of the game, "The Garden of Denial" and "The Furnace of Anger"
- Perma-death, challenging enemies will test the sternest of players

-
- Glorious soundtrack by Ben Prunty (FTL/Gravity Ghost)
 - Pills to temporally upgrade your stats
 - Explore FrankJohn's underground hideout

Planned Features Content

- More areas - The Cistern of Depression and the final showdown with Dr. Harmin in the "The Lab of Isolation"
- More variety, challenges and secrets - We have lot's of fun stuff in store
- More Skullcaps - these are so much fun to make we want to keep making them forever
- More enemies - Each new area will have roughly the same amount of enemies currently available
- More bosses - Dr. Harmin's most prized creations are being readied for battle
- More glorious soundtrack by Ben Prunty

Bug Fixing

- We have put a lot of effort into making sure FranknJohn is as bug free as possible, however the game is in Early Access so it is unavoidable. We will do our best to squish them as soon as they present their ugly heads.

Balancing

- A game like this lives or dies on it's balance, so expect a lot of tweaking to occur throughout Early Access.

Retention is a game made by russian developers V artists,which is about...getting your memorise back!

You fall of your bicycle and memories just came up in your head,and your goal,is to get those back before the times up. Let's be honest,this is a okay plot,really intresting.

My biggest problem with this game...well,for me it's not feels like a game.You are watching photos and choose 1 of it from a group of 3 photos,and try to get a stable memory,while your time is limited,so you most likely going to click furiously.There are total of 4 endings,however that's not true either,because you can get other variants of endings...what I found out,there are 16 different endings which sound cool actually...but you most likely won't even bother with those,because you will get bored,either confused about this product.

The pictures actually looks okay,there are some really beautiful ones.A big negative point to the windows mode,because you cannot put this game to full screen.

The music was just weird for me,to be honest,I never heard anything like it...I didn't enjoyed it.

I played this game through once in 10 mins,but it felt like half an hour.I like story based games and choices matter games,this kinda like those "tags",but for me,it's just kinda confusing and not understandable.Don't buy it,not even worth it,only if you want relaxing or watch some photos,or get confused by the music...but atleast the steam badge levels for this game looks nice.. Bought it a few days ago for the standard price.

Now it's on sale.

10/10. Pros:

- Feels like an NES game for the most part
- Has some good pixel art(compared to most of steam pixel art indie games)

Cons:

- Mostly trial and error game
 - Bosses were a mess. attacks, inconsistent hitboxes, not fun to play againts, weren't mechanically very deep, and most of all they weren't memorable. Final boss had hitboxes, unfair stun-lock mechanic and wasn't very hard. It only had mechanics
 - Story was interesting but there was no development to it. Characters were just mostly there and didn't appoint to anything. No interesting moments to point out, no interactions with the characters, no stakes were at hand since why would I, as the player, give a since none of th characters do anything meaningful.
 - Most of the attacks fly in an arc. This would be fine if there would someone kind of normal punch or weapon attack that would be easy to use and fast. I know theres a kick attack but that does not work very well against enemies, since most of them are airborne.
- Potion 1 is useless after world 3, potion 2 is the worst attack in the game, potion 3 has freeze and fire form but that sucks, since the potion has to hit a wall to change the effect, potion 4 is the best potion since it flies in a straight line. Most of the potions are

rendered useless against the bosses(except the final boss) because all of the potions are weaker than charging a fairy attack that you get in the beginning of the game. You can't spam the potion bottles because all of the bosses have invincibility frame that lasts for 3 seconds.

- Music sounds generic and has no punch to it.

Don't buy this game. There are better ones out there.

. DONT DOWNLOAD THIS TRASH!!!. Given the controls and interface, I can only assume this was meant to be a mobile game. Ended up with a coupon, got it for 20 cents. Still couldn't make it worth my time.. This game was pretty good over all. The game mechanics were good except that you had to close your backpack to select some things. The dialogue and puzzles were pretty juvenile. This will be a good game for my 8 year olds, but it barely held my attention. One big plus is the hint feature. This removed the need for a walkthrough and removed the frustration with being stuck. I didn't use it often, but when I did it was usually because the item was tiny or hard to see. This would have been super frustrating without the hint feature. It's brief but accomplishes the goal it set out to accomplish. It meets my \$1 per hour of game play rule when on sale.

6/10 Good but juvenile. I fell in love with this game.

If you're an adventure gamer and like detective stories, this is the game for you. There are five cases you have to solve, sometimes intertwined because you meet characters from previous cases which is often a lot of fun. You can fail to solve a case if you miss a clue or you can send the wrong person to jail - it almost happened to me, because I didn't talk to one person I missed a whole string of events. So you do some good old detective work but, although very well done, that was not what I liked the most. It was the characters. I don't want to get into it too much (spoilers!), but let's just say one person made me laugh as well as cry over the course of the game, you'll know who I mean when you play it. On this note, the dialogues and voice-acting are excellent from everyone involved, you can tell a lot of thought and love went into this. Highly recommend and much love to the developers from Germany!

. amazing game with amazing atmosphere. too short! Idont mind paying more for content like this that takes more than 20mins to finish.

you have to re-level a new character every map, which completely removes the RPG element enjoyment, I can't actually see the point of this game. Not very random, not very good.. Won't play audio. Seems like a fascinating game. Too bad I can't hear anything. No options to change audio output. Despite the fact that this is a VR game, designed for VR, and yet the audio plays from somewhere behind me dimly, rather than into my headphones? wtf? refunding.. great game 9/10. it costs too much

crap controls

not fun

dont bother

no..... really..... dont waste ur time. A lot of people will find that this game is really a achievement hunter game. (You got tonnes of achievement when you complete the game). But i find the gameplay is minimalist, fun and challenging. Not a no brainer game. Recommended for all achievement hunter, and gamers who want to find different game to play.. If you're a fan of Shmups you should buy this game, you'll have a blast with it. Really great twin-stick control scheme makes it easy to get into and lets you do some pretty fancy moves. Animations are good, has a fun style to itself, and plays really well in co-op! Played great right out of the box, worked with my controller without having to fiddle with anything. Good number of unlockables to keep you coming back. Lots of weird enemy designs that feel unique. Cool powerups. What else can I say? Feels like a long-lost coin-op arcade shmup. Can't beat it for the price!
